OMNIPOD® 5 SIMPLIFY LIFE®

The Pod has a waterproof IP28 rating for up to 7.6 metres (25 feet) for 60 minutes. The Controller is not waterproof.

Order free demo Pod* today at omnipod.com/en-au

Always read the label and follow the directions for use.

Omnipod 5 Automated Insulin Delivery System Important Safety Information.

The Omnipod 5 Automated Insulin Delivery System is indicated for use by individuals with Type 1 diabetes mellitus in persons 2 years of age and older. The Omnipod 5 System is intended for single patient, home use and requires supervision of the user's healthcare provider. The Omnipod 5 System is compatible with the following U-100 insulins: NovoLog®/NovoRapid®, Humalog®, Trurapi®/Insulin aspart Sanofi®, Kirby®, and Admelog®/Insulin lispro Sanofi®. Refer to the Omnipod® 5 Automated Insulin Delivery System User Guide and www.omnipod.com/safety for complete safety information including indications, contraindications, warnings, cautions, and instructions. Warning: DO NOT start to use the Omnipod 5 System or change settings without adequate training and guidance from a healthcare provider. Initiating and adjusting settings incorrectly can result in over-delivery or under-delivery of insulin, which could lead to hypoglycaemia or hyperglycaemia.

1. Brown S, et al. Diabetes Care. 2021;44:1630-1640. Prospective pivotal trial in 240 participants with T1D aged 6 - 70 yrs [adults/adolescents (n= 128; aged 14-70 yrs) children (n=112; aged 6-13.9 yrs)]. Study included a 14-day standard therapy (ST) phase followed by a 3-month Omnipod 5 hybrid closed-loop phase. Mean time >180 mg/dL or >10 mmol/L in adults/adolescents and children, ST vs. 3-mo Omnipod 5: 32.4% vs. 24.7%; 45.3% vs. 30.2%, P<0.0001, respectively. Mean time <70 mg/dL or < 3.9 mmol/L in adults/adolescents and children, ST vs. 3-mo Omnipod 5: 2.9% vs. 1.3%, P<0.0001; 2.2% vs. 1.8%, P=0.8153, respectively. Results measured by CGM. Study funded by Insulet.
2. Sherr J.L, et al. Diabetes Care. 2022. 45(8):1907-1910. Prospective trial in 80 participants with T1D aged 2 - 5.9 yrs. Study included a 14-day standard therapy (ST) phase followed by a 3-month Omnipod 5 hybrid closed-loop (HCL) phase. Mean time >180 mg/dL or >10 mmol/L in very young children (2 - 5.9yrs) as measured by CGM: ST = 39.4%, 3-mo Omnipod 5 = 29.5%, P<0.0001. Mean time <70 mg/dL or < 3.9 mmol/L in very young children (2-5.9 yrs) as measured by CGM: ST = 3.43%, 3-mo Omnipod 5 = 2.46%, P=0.0204. Results measured by CGM. Study funded by Insulet.

*The demo Pod is a needle-free Pod that does not deliver insulin. Controller not included.

MAKE DIABETES A SMALLER PART OF LIFE

For people with Type 1 diabetes, ages 2 years and older

TUBELESS, AUTOMATED INSULIN DELIVERY

Omnipod® 5 is a two part system that integrates with compatible Sensors

Omnipod 5 Controller

Take control with the Omnipod 5 handheld device.

Pod

Tubeless, wearable and waterproof† with built-in SmartAdjust™ technology — a predictive insulin algorithm — the Pod sits right on your body and helps to keep glucose in range.^{1,2}

Your Sensor

In constant communication, your Sensor* sends glucose values and trends to the Pod to help the System make automated insulin delivery decisions. Please visit omnipod.com/en-au for a list of compatible Sensors.

Screen image is an example, for illustrative purposes only.

Pod shown without necessary adhesive.

*Sensor prescribed and sold separately. Compatible Sensor options may vary by country.

†The Pod has a waterproof IP28 rating for up to 7.6 metres (25 feet) for 60 minutes. The Controller is not waterproof.

ADJUSTING SO YOU DON'T HAVE TO

SmartAdjust™ technology is the brains behind the Omnipod 5 System, helping to protect against highs and lows.^{1,2} The System predicts where glucose values will be in 60 minutes and automatically increases, decreases, or pauses insulin every 5 minutes based on your sensor value and trend. Bolus doses can be given for meals using the Omnipod 5 Controller.

MEALTIME MATHS, DONE FOR YOU

The SmartBolus Calculator makes it easy to determine the right amount of insulin for meals and snacks. It uses the Sensor's value and trend along with carbohydrate amount to calculate a precise mealtime dose — no need for guessing. Plus, with just a few taps on a touchscreen, it's simple to use, or to teach caregivers to use, like grandparents, babysitter or school nurse.

GET GOING WITH ACTIVITY FEATURE

When turned on, Activity Feature reduces insulin delivery for times when glucose typically goes low, like exercising. Whether hitting your step goal or playing sports, Omnipod 5 makes the balancing act easier.

CONTROLLED BY A HANDHELD DEVICE

Take full control of the System at any time with just a few taps. Bolusing for a meal, enabling Activity Feature and even changing your Pod more looks just like sending a text with the Omnipod 5 Controller.
